

# Your energy saving kit

**Thank you** for taking a step toward  
using energy and water more efficiently.

Follow these instructions  
to install the products  
included in your kit  
and start saving water  
and energy.

### What's inside:

- (1 or 2) Earth massage showerhead(s)
- (2) Bathroom faucet aerators
- (1) Dual-spray kitchen faucet aerator
- (1) Roll plumber's tape

### What you need:

- Wrench or pliers
- Soft cloth
- Old toothbrush (for cleaning)

If you have received any broken or defective items in this kit, or have any questions regarding these products, please call us at **877.886.4239**.

# Earth<sup>®</sup> massage showerhead

**Tip:** Unscrew by hand or use two wrenches or pliers (one on shower arm, other on showerhead) and cloth to protect the finish.

## Step 1

Remove the old showerhead.

## Step 2

Clean pipe threads and turn on the water to wash out the pipe.

### Step 3

Wipe off excess water from the threads and apply plumber's tape.

### Step 4

Screw on the new showerhead. Protect the finish with a cloth.

### Step 5

Test showerhead. If showerhead leaks, tighten until snug, but do not over-tighten.

**To clean:** Unscrew nozzle and remove any debris. Soak nozzle in vinegar.

# Faucet aerators

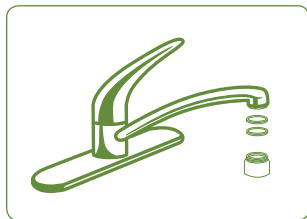

## Step 1

Remove old aerator and turn on the water to wash out faucet.

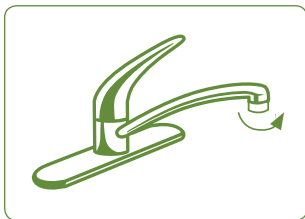

## Step 2

**Faucets with external threads:** mount one rubber washer.

**Faucets with internal threads:** mount two rubber washers.

### Step 3

Screw on new aerator by hand.

### Step 4

Turn on water. If aerator leaks, tighten until snug, but do not over-tighten. Protect the finish with a cloth.

**To clean:** Remove aerator and rinse parts occasionally.
